Professional Experience

ITGlobers - Back End Engineer (Feb. 2023 - Present)

Back end developer for marketplaces and e-commerce projects working with Typescript, Node.js, Express.js, Koa.js, API's, and VTEX IO. Notable projects include:

- Development of a service to synchronize order statuses between the e-commerce platform and the client's ERP system.
- Development and migration to documents uploading using Google Cloud Storage buckets with PHP.
- Audit of architecture, integrations, and custom applications for e-commerce optimization.
- Development of integration solutions between VTEX e-commerce and payment provider systems. Contributed as a back-end developer and leader of the payments development team.
- Integration of JIRA with Google Forms for workflow automation.
- Design and development of a solution for data synchronization between two storage systems.

Academic Experience

Bootcamp Full Stack Web Developer

Henry, 2022
